BASIC TRAINING

An introduction to Casambi

The aim of the "General" Casambi training course, is to give the trainee a basic understanding of the Casambi BLE lighting control system. This course is ideal for anyone with no knowledge of Casambi.

By the end of the 2 day course, the trainee will be able to create simple networks with basic levels of control.

Day 1

Introduction to Casambi

Casambi hardware

Casambi app, basic overview

System Demonstration

Day 2

Casambi app, basic overview cont.

Feature demonstration

Commissioning

Hands-on exercise

- Perfect for those new to Casambi
- Up to 12 people per course
- Refreshments & lunch included
- Practical, hands-on demonstrations

*COURSES AVAILABLE ACROSS UK, GERMANY, AUSTRIA, NEW ZEALAND & AUSTRALIA - CONTACT YOUR LOCAL REPRESENTATIVE FOR REGIONAL RATES

ADVANCED TRAINING

Enhanced Casambi

The aim of the "Enhanced" Casambi training course, is to build on the basic knowledge gained in the "General" training, and enable the trainee to design and deliver Casambi BLE lighting controls on to real world projects. This course is designed for users of Casambi with a basic understanding of the system. By the end of the course, the trainee will be able to design and create multi-network projects with complex control strategies and integration into third party control platforms.

Day 1

Casambi mesh solution, system and hardware refresh

Network design considerations and device locating

Casambi app deep dive, all core elements.

Day 2

The Casambi app in detail, control devices and configuration considerations

Casambi connectivity, Internet & DALI Gateway integration into 3rd party controls products

Day 3

Multi-network "Sites" control

Project planning best practice and commissioning procedures

Casambi API overview
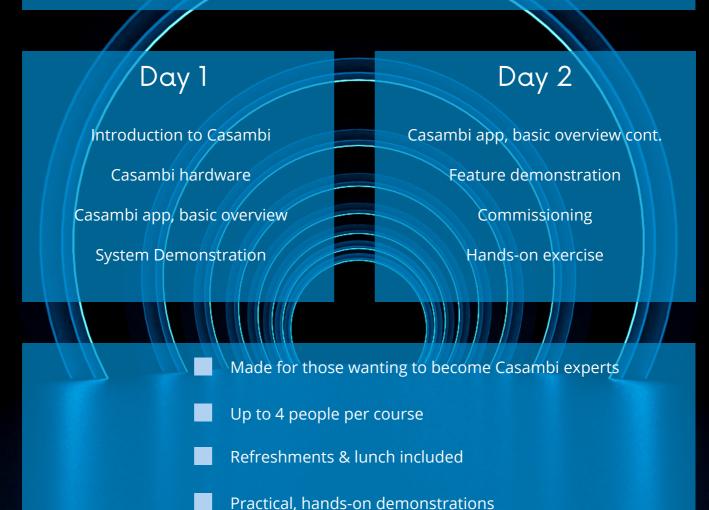

Hands-on exercises

- The next step for those familiar with Casambi

- Up to 8 people per course

- Refreshments & lunch included

- Practical, hands-on demonstrations

*COURSES AVAILABLE ACROSS UK, GERMANY, AUSTRIA, NEW ZEALAND & AUSTRALIA - CONTACT YOUR LOCAL REPRESENTATIVE FOR REGIONAL RATES

4C CERTIFICATION

The 4C course is aimed solely at individuals with a high proficiency in designing, commissioning and configuring Casambi networks. This is is not a "training" course and is not suitable for those unfamiliar with Casambi.

The aim of the course is to evaluate the competency of the individual and, where this competency is deemed to be sufficient, will result in the issuing of an official competency certificate by Casambi as well as the individual being listed as 4C qualified on the Casambi website. Companies and organisations cannot be "4C certified" nor can they claim to be 4C accredited. Companies may promote that they have Casambi certified staff in their employment.

Day 1

Introduction to Casambi

Casambi hardware

Casambi app, basic overview

System Demonstration

Day 2

Casambi app, basic overview cont.

Feature demonstration

Commissioning

Hands-on exercise

- Made for those wanting to become Casambi experts
- Up to 4 people per course
- Refreshments & lunch included
- Practical, hands-on demonstrations
